of historical interest from
time to time. This one is a
book: a book about what
happens when a candle
burns, a book about

(archive) - b Bruner - As an
amusing side note, in a
science essay called "The
Sight Of Home" Isaac
Asimov once calculated
how far an interstellar
colony would have to be
from Terra before Sol was
too dim to be seen in the
colony's night sky with the
naked eye. Turns out that
colonies further than 20
parsecs (65 light-years)
cannot see Mankind's
Homestar, because Sol's
apparent magnitude is
dimmer than 6.
